Chro	omosomes are found in nearly all human	cells.		WWW	v.accesstuition.com
(a)	How many chromosomes are there in	most human bo	dy cells?		
	Tick one box.				
	23				
	24				
	46				
	48				
(b)	How many chromosomes are there in a	a human gamet	e cell?		(1)
(c)	Complete the sentences. Choose the answers from the box.				(1)
	sexual reproduction binary fiss	sion egg	fertilisation	meiosis	
	mitosis ovary	sperm	testis	uterus	
	The female gamete is called the				
	The male gamete is called the		-		
	The female gamete is produced in the			•	
	Gametes are produced by a type of ce	ll division			
	called	·			
	Male and female gametes join togethe	r in a process			
	called				
					(5)

Chromosomes carry genetic information.

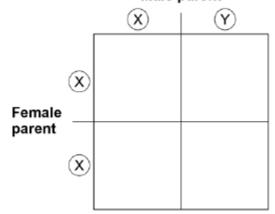

1.

In humans, the sex chromosomes are called \boldsymbol{X} and \boldsymbol{Y} .

Male parent

(d) Complete the diagram above to show the sex chromosomes inherited by the offspring.

(e) What is the chance that a child produced by these parents will be female?

Tick **one** box.

- 1 in 2
- 1 in 3
- 1 in 4
- 3 in 4

(1)

(2)

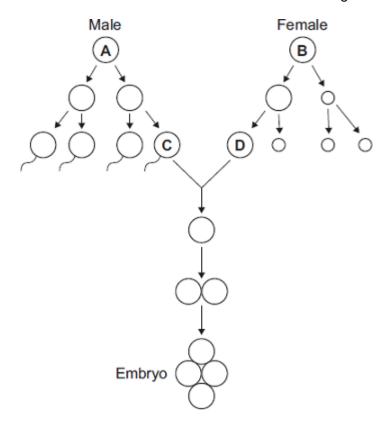

(f)	The parents shown in the diagram above have five children. Give two reasons why these children all look different from each other.

Cell	division is needed for growth and for reproduction.					
(a)	The table below contains three statements about	cell division.				
	Complete the table.					
	Tick one box for each statement.					
		Sta	atement is true	for		
	Statement	Mitosis only	Meiosis only	Both mitosis and meiosis		
	All cells produced are genetically identical					
	In humans, at the end of cell division each cell contains 23 chromosomes					
	Involves DNA replication					
			I	(2)		
Bluel	bell plants grow in woodlands in the UK.					
•	Bluebells can reproduce sexually by producing se Bluebells can also reproduce asexually by making					
(b)	One advantage of asexual reproduction for bluebells is that only one parent is needed.					
	Suggest two other advantages of asexual reproduction for bluebells.					
	1					
	2					

2.

(c)	Explain why sexual reproduction is an advantage for bluebells.	Access Tuition

The diagram shows some of the cell divisions that occur during human reproduction.

3.

(a) (i) Name the type of cell division that produces cell **D** from cell **B**.

(1)

(Total 8 marks)

(ii) Which organ in the male body produces cell C from ce	ell A ?
--	----------------

(1)

h)	(i)	Cells A	and B	each	contain	46	chromosomes.
v	, (i)	Ocho F	t and D	Cacii	Contain	τU	CHICHIOSOHICS.

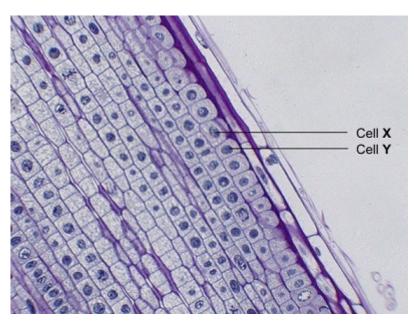

How many chromosomes would there be in the nucleus of cell **C**? (1)

(ii) Why is it important that cell **C** has this number of chromosomes?

(2) (Total 5 marks)

The photograph shows some cells in the root of an onion plant.

4.
